This is the first time in memory that I'm glad to see someone from a "right-wing" party. Or from the "right," period. (Vitter got a pass for appearing to feel sorry for himself, and I know there's a hell of a lot of liberals out there who feel sorry for Vitter because he's having trouble hitting those slippery slopes. That said, he's admitted to the

same behavior and has been trying to come out for months now. The whole right-wing-will-take-the-fall storyline is hogwash and really has no place here.) But take it from someone who actually listens to what people say on right-wing radio. Mitt Romney does not run the GOP. Ron Paul

KEYMACRO is a tool for controlling your Windows system via keyboard shortcuts. Windows key: Keyboard shortcuts can help you to control various tasks on your

Windows system, such as to change volume, or the video and audio format of the multimedia files, or to change the system language. Using the keyboard is a simple method to control your system without using the mouse. Keymacro allows you to easily save a set of keyboard shortcuts to a batch file for easy editing and reuse. KEYMACRO can import CSV files to associate shortcut with application name, command line parameter, or both. You can add shortcut for new actions that doesn't exist in Windows for those

applications. Keymacro can record shortcut as single keystroke or a combination of keystrokes. Keymacro can import and export shortcuts from any folder, and it also can reset all shortcuts. Multiple keyboard layouts (for example, Us, Us International, UK, France, and so on). Two modes: Run mode is the default mode. It runs the keyboard shortcuts as fast as possible, without having to wait for your input. Stop mode is an alternative. It runs the keyboard shortcuts as fast as possible, but you can stop them at any time by

pressing the Esc key. Import / Export: Import CSV file for keyboard shortcuts and application. Export CSV file for reset all shortcut. Import Windows shortcuts file to record keystrokes with the desired sequence. Save keyboard shortcut, for example, Windows 7, Windows 8 and so on. Multiple keyboard layouts: You can import keyboard shortcuts from many keyboard layouts such as Qwerty, Colemak, and so on.

KEYMACRO Keymap Utility:
The KEYMACRO Keymap utility helps you to run

keymacro.bat file easily and quickly by pressing only one key. When you press the key, it will start running the keymacro.bat file in run mode. If you want to stop, press Esc. If you want to pause, press any key. KEYMACRO Auto Run/Stop: Press any key to start, stop or pause automatically. Press Esc or the keyboard button to stop automatically. KEYMACRO Import / Export: Import CSV file for keyboard shortcuts and application. Export CSV file for reset all shortcut. Import Windows shortcuts file to

record keystrokes with the
desired sequence. Save
